SUMMARY

16+ years in IT, managing projects over \$1M in value for international finance and telecom clients. As a Team Lead, coordinated teams of up to 10, applying knowledge in Java, Kotlin, frontend, and DevOps. Delivered data-intensive applications, impacting millions of users. Off the clock, an avid marathon runner, a discipline that mirrors professional perseverance. With a T-shaped skill set, ready to contribute to impactful project outcomes.

PROFESSIONAL EXPERIENCE

Luxoft Serbia, Belgrade, Serbia

Oct 2022 – Present

Lead Java Developer

- Coordinated a team of 7 as a Team Lead and Senior Java Developer/DevOps on the Credit Suisse project, delivered 100% of the scope on time and within budget.
- Engineered a Cloud HTML5 platform and API, facilitating the creation of the bank's web UIs for over 100 internal users.
- Boosted project stability and elevated performance metrics to a 99.95% SLA level.
- Administered production processes, achieving a 90%+ error-free rate in timely project delivery and a stable continuous integration and continuous delivery (CI/CD) process.
- Leveraged technologies such as Java, microservices, OpenShift, Mongo, Redis, Prometheus, and Jenkins, managing four distinct environments.
- Executed a strategic asset transfer to a support team during an unexpected project termination, minimizing losses by 100% and securing seamless business continuity for all stakeholders.

Luxoft, Moscow, Russia

Mar 2022 – Oct 2022

Lead Java Developer

- Fortified a global team in developing the "Monitoring as a Code" application as a Senior Java Developer for an outsourced Credit Suisse project. Achieved 100% project completion within the predetermined timeline.
- Implemented global refactoring in the application managing monitoring configurations for hundreds of internal projects, reducing repetitive code by 15%.
- Orchestrated the transition of a complex microservice project, ensuring 100% system availability and completion of all tasks within the set deadline.
- Adopted key technologies such as Java 11, MyBatis, Oracle Database, and OpenShift, contributing to the project's success.

Beeline Russia, Moscow, Russia

Oct 2021 – Mar 2022

Senior System Architect

- Assumed the role of Senior System Architect for an Identity Provider project, designed for 50 million potential users.
- Orchestrated the architecture for this data-intensive project, accelerated MVP implementation, and achieved production launch in 3 months, meeting 100% of time expectations.
- Expanded the team from 1 to 5, leading in the recruitment of a Product Owner, DevOps, Team Lead, and Senior Kotlin developer, alongside the selection of a contractor.
- Guided the product's technical trajectory, offering consultations on a dozen integration issues.
- Applied technologies such as Quarkus, GraalVM, Kotlin, Kubernetes, and Postgres, contributing to project success with an efficient scaling time of 0.1 seconds.

Bell Integrator, Moscow, Russia

Apr 2020 – Oct 2021

Lead Java Developer

- July-October 2021: Optimized Tinkoff Bank's data-intensive customer application repository, managing over 50K RPS (Requests Per Second), as an outsourced Senior Kotlin Developer. Boosted service performance and conducted profiling using Kotlin, Postgres, and OKD.
- March-June 2021: Led "Credit Agreements" project development from scratch at Otkritie Bank. Directed a 5-person team, ensuring on-time completion using Kotlin, Spring Boot, Hibernate, and Docker.
- Mar 2020-Mar 2021: Led a 4-person team at Freedom Finance, developing a trading terminal using Kotlin, Spring Framework, and Kubernetes; project completed on schedule.

Bell Integrator, Moscow, Russia

May 2018 – Mar 2020

Java Developer

- November 2019-February 2020: Outsourced Java Developer for VTB Bank PJSC. Enhanced the "Loans" project using Java 8 and a microservice architecture. Undertook revisions, bug resolution, and production support. Deployed the project within the deadline.
- December 2018-November 2019: Implemented microservice architecture and Java 8 as a Java Developer for VTB Bank PJSC on the "Documentary Operations" project. Launch aligned with the scheduled time frame.
- May 2018-Nov 2018: Developed "Letters of Credit" and "Escrow Accounts" projects for Sberbank PJSC as an Angular Developer, using TypeScript, RxJs, and CSS/SCSS. Completed projects 10% ahead of the set timeline.

Siblion, Moscow, Russia

Jul 2016 – Apr 2018

Java Developer

- August 2017 to April 2018: Functioned as a Java Developer for Sberbank PJSC, focusing on pre-approved offers migration. Constructed a new project using Java 8, integrated into the bank's framework.
- July 2016 to July 2017: Focused on an MTS PJSC project, creating and maintaining an Enterprise Service Bus project. Developed using Java 7, GlassFish, and WebLogic. Offered third-line technical support.

MTS Group, Moscow, Russia

Nov 2014 – Jun 2016

Senior Software Engineer

- Administered the ESB test environment, coordinated testing scrutinized Java 7 code, and participated in bug analysis.
- Orchestrated actions of developers, testers, and administrators as a third-line support engineer, enhancing service quality for 70 million customers.
